Claims 12-19 are presented for examination.

Applicants' request for reconsideration filed August 3, 2009 has been received and entered.

Accordingly, the rejection made under 35 USC 112, first paragraph (New Matter) as set forth in the previous Office action dated March 2, 2009 at pages 2-3 as applied to claims 12 and 15-19 is hereby withdrawn because of applicants' remarks.

The objections to claims 13 and 14 are withdrawn so that a new rejection can be made.

Claim Objections

Claims 15-17 and 19 are objected to.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 12-14 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schmaus et al. (7,582,681 B2 with a foreign priority date of 2/19/2002).

Schmaus et al. teach an antimicrobial composition comprising a mixture of 1,2-alkanediols consisting of two or more straight chain 1,2-alkanediols (see the abstract). Note column 32, claim 4 shows one of the combination of the 1,2-alkanediols can be a combination of 1,2-pentanediol, 1,2-hexanediol and 1,2-octanediol (same as applicants' claim 1). Note column 33, claim 10 shows the combination of the two 1,2-alkanediols is combined with a preservative such as benzoic acid (a co-biocide) or 2-phenoxyethanol (see column 34, claim 13).

Clearly, the cited reference teaches an antimicrobial composition comprising the mixture of three 1,2-alkanediols(a) and (b) 2-phenoxyethanol without a co-biocide (note in applicants' claim 1, 0-10% of a co-biocide means no co-biocide is present if 0% of co-biocide is present).

The instant invention differs from the cited reference in that the cited reference does not teach the specific amounts of each individual component of the said antimicrobial composition. However, to determine specific amounts of each individual component in the instant antimicrobial composition having optimum effectiveness together is well within the level of one having ordinary skill in the art, and the skilled artisan would have been motivated to determine optimum amounts of each component to get the maximum effectiveness in the absence of evidence to the contrary.

Claims 12-14 and 18 are not allowed.
